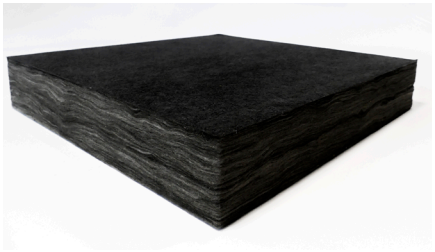
NIGHT Panel

Our **NIGHT Panel** offers an inexpensive way to treat a space that requires a black ceiling with excellent acoustical absorption performance. The panel is made from a 6-7 pcf fiberglass core with a solid black matte facing (panel edges can be inconsistent in color — see image on the right). The panel can be easily installed in a variety of ceiling settings, including a lay-in grid, as well as mechanically clipped or painted pucks to mount directly to ceiling deck.



APPLICATIONS:

The **NIGHT Panel** is a perfect choice for live music venues, houses of worship, retail stores, and home theaters looking for an affordable, acoustical black ceiling.

SOUND ABSORPTION

Hz	125	250	500	1000	2000	4000	N.R.C.
